Category review: Chips

Retail Analytics

Classification: Confidential

Our 17 year history assures best practice in privacy, security and the ethical use of data

We all have a responsibility to use data for good

Privacy

- We have built our business based on privacy by design principles for the past 17 years
- Quantum has strict protocols around the receipt and storage of personal information
- All information is de-identified using an irreversible tokenisation process with no ability to re-identify individuals.

Security

- We are ISO27001 certified - internationally recognised for our ability to uphold best practice standards across information security
- We use 'bank grade' security to store and process our data
- Comply with 200+ security requirements from NAB, Woolworths and other data partners
- All partner data is held in separate restricted environments
- All access to partner data is limited to essential staff only
- Security environment and processes regularly audited by our data partners.

Ethical use of data

Applies to all facets of our work, from the initiatives we take on, the information we use and how our solutions impact individuals, organisations and society.

Quantum believes in using data for progress, with great care and responsibility. As such please respect the commercial in confidence nature of this document.

Executive summary

01

Task 1

To better understand the types of customers who purchase chips and their purchasing behavior within the region

02

Task 2

Store numbers 77, 86 and 88 as trial stores and want control stores to be established stores that are operational for the entire observation period.

We would want to match trial stores to control stores to the trial period prior Feb 2019 in terms of:

- Monthly overall sales revenue
- Monthly number of customers
- Monthly number of transactions per customer

Evaluate trial store performances, determining if they were successful

01

Category

Overview:

Sales have mainly been due to Budget - older families, Mainstream - young singles/couples, and Mainstream - retirees shoppers. We found that the high spend in chips for mainstream young singles/couples and retirees is due to there being more of them than other buyers. Mainstream, midage and young singles and couples are also more likely to pay more per packet of chips. This is indicative of impulse buying behaviour.

We also found that mainstream young singles and couples are 23% more likely to purchase Tyrrells chips compared to the broader population. To enhance category performance, the Category Manager could consider strategically placing Tyrrells products and smaller chip pack sizes in high-visibility, discretionary areas that are frequently visited by this segment. This approach may help increase product visibility and encourage impulse purchases.

Total Sales by Lifestage and Premium Customer

Total Customers by Lifestage and Premium Customer

02

Trial Store Performance

Context:

We matched trial stores 77, 86, and 88 with control stores 31, 155, and 237 respectively. We used the pearson correlation metric

	correlation	avg_sales
STORE_NBR		
77	1.000000	5.359621
31	1.000000	7.400000
11	1.000000	3.350000
215	0.887080	8.306748
195	0.804225	5.026406
46	0.722829	5.563291
270	0.716361	6.869692
143	0.674554	8.172205
157	0.654122	6.874553
225	0.624368	6.929010

	correlation	avg_customers
STORE_NBR		
86	1.000000	99.571429
155	0.942876	99.571429
114	0.855339	105.857143
260	0.846502	47.714286
176	0.796380	41.571429

	correlation	avg_customers
STORE_NBR		
88	1.000000	1.230332
237	0.947326	1.211761
14	0.942976	1.000000
178	0.939466	1.299306
35	0.899594	1.016740

Trial Store Sales During Trial Period

The results for trial stores 77 and 88 during the trial period show a significant difference in at least two of the three trial months but this is not the case for trial store 86. We can check with the client if the implementation of the trial was different in trial store 86 but overall, the trial shows a significant increase in sales.
